# URGENT NOTICE TO RESIDENTS

*Precautionary Drinking Water Advisory – May 16, 2023*

A Precautionary Drinking Water Advisory (PDWA) is currently in place for The Town of Indian Head. The chlorine injector is not operating at the Water Treatment Plant preventing disinfection of the water supply. Until the issue is resolved and the Town can confirm the water is safe for consumption the PDWA will remain in effect.

Please follow the instruction on the back of this letter until you hear otherwise.

If you have any further questions, please do not hesitate in calling the Town Office.

# Precautionary Drinking Water Advisory

**This Advisory applies to residents and users of Town of Indian Head water distribution system and is effective May 16, 2023 until further notice.**

Pursuant to clause 36(1)(a) of *The Environmental Management and Protection Act, 2010* this Precautionary Drinking Water Advisory is issued due to low disinfection residual resulting in a unsafe water quality and therefore the safety of the drinking water supply cannot be ensured at all times. Therefore, pursuant to Clause 36(1)(b) of *The Environmental Management and Protection Act, 2010*, consumers must be notified to:

- (a) boil all water, used for drinking purposes, for at least one (1) minute, at a rolling boil, prior to use;
- (b) boil water to be used for other activities where it may be ingested, including: (i) brushing teeth or soaking false teeth;  
(ii) washing fruits and vegetables;  
(iii) food or drink which will not be subsequently heated; and  
(iv) ice cubes;
- (c) not use the water for washing dishes, unless the water has been boiled or the dishes are sanitized in another fashion. Washed dishes and utensils can be soaked in a bleach water solution (approximately 2 tablespoons of bleach per gallon or 10 ml of bleach per liter of water) for at least two minutes after being washed to kill any bacteria which may be present. Note: **Do not mix bleach with soaps or detergents;**
- (d) not drink from any public drinking fountains supplied with water from the public water supply;
- (e) ensure that younger children and infants are sponge bathed;
- (f) use an alternative water source known to be safe, if they do not wish to boil the water; and
- (g) consult with your physician if you have cuts or rashes that are severe before using the water.

Under most circumstances, there is no need to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Laundry may be washed in tap water, either by hand or by machine. This Advisory is effective on the date and time listed above, and will not be lifted until the water supply is determined to be completely safe.
